Re: Invitation to attend the 13th International Congress on Amino Acids, Peptides and Proteins (ICAPP)  
between October 5-7, 2013 at Galveston, Texas, USA

Dear Colleagues:

The 13th International Congress on Amino Acids, Peptides and Proteins (ICAPP) will be held Oct. 5-7, 2013 at Galveston, Texas, USA. Scientific topics to be included in this conference will include biochemistry, biomedicine, chemistry, food science, immunology, nutrition, physiology, pharmacology, reproduction, and toxicology of amino acids, peptides, and proteins, as well as genetics and bioinformatics related to their synthesis, catabolism, and utilization in humans and other animal species.

As President of the 13th ICAPP, I would like to invite you to participate in this meeting by presenting scientific papers on or discussing research progress in the subject matters. The forum will provide an invaluable opportunity for scientists and students to learn from exciting research conducted outside of their own laboratories, to develop new research collaborations, and to freely exchange scientific ideas in a friendly setting. Galveston is a beautiful coastal city and I am sure that you will enjoy tours of the Galveston Island before or after our Congress.

It is my understanding that you will cover the costs of your travel from your home city to Galveston, including airline tickets, medical insurances, meals, and hotel rooms. Online registration fee for the 13th ICAPP is \$525 before/or on July 30, 2013 and \$625 after July 30, 2013. Please visit our website (<https://agriliferegister.tamu.edu>) to register for the meeting and obtain information about making your hotel reservations at discounted rates.

On behalf of the organizing committee of the 13th ICAPP, I am pleased to welcome you to participate in its scientific program and look forward to meeting you in October 2013. Please feel free to contact me if I can be of assistance in your travel to Galveston, Texas, USA.

Yours sincerely,

Guoyao Wu, Ph.D.  
University Distinguished Professor  
President of the 13th International Congress  
on Amino Acids, Peptides and Proteins
